

Three ways to grow The Care Connexion without growing your ops team

To Bradley Evsich, Co-Founder & COO, The Care Connexion
From Arslan Noor, CTO, ElectroCom IT
Date 29 September 2026

You've proven the model: agencies post referrals, therapists take them directly, no middleman. Growth now depends on how much volume the platform can carry. Each idea below protects a promise already on your site.

01 THREE WAYS TO GROW

1 Self-serve onboarding with automatic credential checks

Today "Free to Join" goes to a contact form, and every therapist is onboarded and checked by hand. Add therapists in days, not weeks, and back your "100% credential compliance" promise with automatic expiry alerts.

2 A mobile app for therapists in the field

Therapists are on the road between visits, and the platform is web only. Push alerts and one-tap accept keep referrals filled in 15 minutes as volume grows.

3 Connect to the agencies' own record systems

Home health agencies run their day in systems like Axxess, HomeCare HomeBase, Kantime or WellSky. Today they approve a visit on The Care Connexion, download the note, and type it again into that system. We link the two: new referrals come in from the agency's system automatically, and signed visit notes go straight back into the patient's record. Agencies stop re-typing, and once you are wired into their daily system, you are hard to replace.

02 WHERE AI HELPS

- Read referral packets and match the best therapist first
- Draft visit notes from a spoken summary, then check them
- Flag hard-to-fill referrals and suggest a rate

03 SECURITY

- Built to HIPAA, with BAA-covered providers only
- Clinicians approve every AI output

04 SUGGESTED NEXT STEP

A 30-minute call on how a referral moves today. We follow with a fixed-scope first phase, most likely idea 1.
